

Announcing Two New Pilot Courses Offered by WSU, WSDA, G.S. Long Company and the Washington State Grape Society!!

- **Tuesday March 5th** – New Vineyard Spray Application Technologies
- **Wednesday March 6th** – New Orchard Spray Application Technologies

These Best Management Practices classes are focused on informing growers of Alternative Spray Technologies available to the industry. Sprayer manufacturers will be participating to share information on their products including - Maintenance, Calibration and Optimization, with a special emphasis on new technologies, rate controllers and more! This course is intended to be very interactive with plenty of time for Q&A.

Spray Application Equipment to Include:

- March 5th Vineyard – Quantum Mist, On Target and Accutech
- March 6th Orchard – Turbo Mist Tower, On Target and Accutech

Both pilot courses are offered in English only and will be held at the WSU-IAREC campus in Prosser from 8am–4pm. Lunch will be provided for all attendees.

Course registration will be capped at 30 participants for each day, so we encourage you to please register now!

***Pre-Registration is required.** Because these are pilot programs they are being offered at the **discount rate of only \$50 each!!**

**To register for either day please contact Maegen Otterstein at
G.S. Long Company
(509) 575-8382 or maegen@gslong.com**

**NOTE – these courses are separate from the Orchard Sprayer Calibration and Best Management (drift reduction) course scheduled for Thursday, March 7th
